

Future of accident reconstruction

page

The Role of accident Investigation in the judicial System and Potential Impact on Road Safety Promotion - Insights Based on Accident Investigation Experts and Lawyers Survey. Presented by Dr Moshe Becker ¹ (1. GIMI. Galilee International Management Institute)	8
Challenges in forensic reconstruction of traffic accidents involving Advanced Driver Assistance Systems (ADAS) Presented by Mr Daniel Paula ¹ (1. University of Ingolstadt) (3 other authors)	19
Electronic data in crashed vehicles - between chance and challenge Presented by Mr Erik Sinen ¹ (1. Verkehrsunfallforschung an der TU Dresden GmbH) (1 other author)	33
Needs and Requirements of EDR/DSSAD - Analysis based on Insurance Claims Reported to Allianz Germany Presented by Mrs Melanie Kreutner ¹ (1. AZT Automotive GmbH)	42

Data retrieval and analysis

Case study: Usage of "black box" data in tramway – pedestrian road accident Presented by Ms Sanja Krajinovic ¹ (1. Forensic Science Centre "Ivan Vucetic")	55
Second Generation of Digital Tachographs - Modifications and Accuracy of Data Presented by Mr Christoph Peltz ¹ (1. KAST GmbH) (2 other authors)	64
Anatomy of a car-following accident Presented by Mr Aart Spek ¹ (1. Netherlands Forensic Institute)	85
Reverse engineering and evaluation of Tesla vehicle logs Presented by Mr Francis Hoogendijk ¹ (1. Netherlands Forensic Institute)	96
Status report: UNECE IWG on EDR/DSSAD Presented by Dr Michael Weyde ¹ (1. Ingenieurbüro Dr. Michael Weyde)	

Human Factors

page

"Sounds of Silence: Comparison of silencing in modern cars compared to non-motorised road users with headphones" Presented by Dr Markus Winninghoff ¹ (1. Unfallanalyse Berlin) (3 other authors)	106
Identification of accident risks at motorway access points and measures against wrong-way drivers Presented by Prof Pflieger Ernst ¹ (1. Head of the EVU-Austria)	116
Night Time Visibility of Pedestrians on Unlit Roads – A Comparison of Analysis Methods and Some Practical Suggestions Presented by Mr Ian White ¹ (1. North West Technical Services Ltd)	128

The transition of control from “Pilot-Assist” to Driver Presented by Mr Gijs van Stekelenburg ¹ (1. HAN University of Applied Sciences dep. Automotive) (1 other author)	141
Faulty application of Tyre Pressure monitoring systems (TPMS) puts drivers and road users at risk Presented by Mr Udo Golka ¹ (1. EVU)	152
07 October	
2021 Vehicles	
Theoretical analysis of potential risks in using EV and HV vs actual field reports. Presented by Ms Olga Liad Nikolsky ¹ (1. TAIR) (1 other author)	174
Handling of accident-damaged electric vehicles Presented by Mr Christoph Nebl ¹ (1. CARISSMA Institute of Electrical, COnnected, and Secure Mobility) (2 other authors)	182
Fitting errors of UHP / RFT (Ultra-High-Performance and Run-Flat Tyres) are causes of serious accidents Presented by Mr Udo Golka ¹ (1. EVU)	191
Automatic force detection and tracking for tensioning devices in commercial vehicle load securing Presented by Dr Gyula Köfalvi ¹ (1. EbK Hungary-Budapest)	204
Experimental investigation of the biomechanical load values by using new and old car seats in rear-end collisions. Presented by Mr Joost Wolbers ¹ (1. Ingenieurbüro Schimmelpfennig + Becke GmbH & Co. KG) (2 other authors)	221
Reliability and performance of the AEB system of a Tesla Model X under different conditions Presented by Mr Klaus Böhm ¹ (1. TH Ingolstadt/ DEKRA) (5 other authors)	239
Motorcycle Engine Braking Performance Presented by Mr Piotr Ciępa ¹ (1. Institute of Forensic Research in Kraków) (1 other author)	253
	Page
E-bike Deceleration Analysis Presented by Mr Berislav Barisic-Jaman ¹ (1. Forensic Science Centre "Ivan Vucetic")	260
The effect of "Roll Bar" installed on QUADRI CYCLE (QUAD BIKE) on occupants safety. Presented by Mr Mahdi Samara ¹ (1. Mahadi College) (1 other author)	268
Reconstruction methods	
Non-linear optimization in accident analysis Presented by Mr Matthias Schmidt ¹ (1. AnalyzerPro KG) E-Scooter vs. Pkw	286
Presented by Mr Roy Strzeletz ¹ (1. Unfallanalyse Berlin)	293
Finite Element Method (FEM) in the reconstruction of rear underride crashes	

Presented by Mr Jakub Zębala¹ (1. Institute of Forensic Research in Kraków)
(1 other author)

Influence of modern vehicle design on occupant load in low speed rear-end collisions

322

Presented by Mr Giorgio Marsano¹ (1. Ingenieurbüro Schal und Meyer Luebeck/Schwerin)

Analysis of video recordings using the lightboard: stabilization of timing, high-speed camera, exposure time

329

Presented by Dr Wojciech Wach¹ (1. Institute of Forensic Research)
(1 other author)
